

Zuber Qureshi

Senior Software Engineer

PROFILE SUMMARY

As a seasoned Full Stack Developer proficient in PHP, Node.js, React, Express.js, MySQL, and CodeIgniter, I possess robust expertise in payment gateway integration, SMS and email integration, delivery partner management, and other 3rd party integrations. With a strong track record in developing projects from inception to deployment, I am adept at working with Jira, Azure, AWS, IBM Cloud Server, and CI/CD pipelines. My extensive experience collaborating with clients from the USA, UK, Korea, and Gulf regions has honed my ability to deliver high-quality solutions tailored to diverse business needs.

ticketing system for the renowned company.

- Developed a B2B e-commerce portal for Avnet, facilitating seamless purchase processes for goods in the UK region, employing technologies such as Node.js, SAP API, React.js, and .NET.
- Collaborated with cross-functional teams to ensure the successful completion of all projects within designated timelines.

Apr 2018 - May 2022

Software Developer

apptech interactive services

I have extensive experience in developing and deploying high-traffic products, including the Arc Launcher, a product built using PHP CodeIgniter for API development, which successfully scaled to over 1 million users. I played a key role in both the backend architecture and API development, ensuring performance optimization and scalability. Additionally, I contributed to Lava Mobile Technologies, where I developed a retailer sales application from scratch, handling everything from the design phase to final production deployment. This application enabled retailers to scan device IMEI numbers, transmitting essential data to secure servers for warranty claims and other key functionalities.

My expertise lies in full-cycle product development, including requirement analysis, system design, API creation, performance optimization, and deployment, ensuring secure and scalable solutions for large-scale platforms.

Projects

825 Days

AVNET HCL DCX

This is a project for EMEA region for HCL with collaboration with Avnet . Where we have developed a E-com portal

1039 Days

Avnet IOT

this is an IOT based product which is used to track devices

61 Days

Blockchain Selling of digital art

it is blockchain based project where user can buy digital art and it will be saved on etherium chain . Link <https://canverse.org/>

1282 Days

sushain clinic

it is Ayurvedic health care project . where doctor can consult with patient and can purchase medicines from portal. Link <http:s//sushainclinic.com/>
